

**MIDAS # 1512**  
**DEBOULLIE LAKE**  
 T. 15. R. 9., AROOSTOOK CO., MAINE

AREA 262 ACRES

# DEBOULLIE LAKE

T15 R9, Aroostook Co.  
U.S.G.S. Deboullie Pond, Maine (7 1/2')

## Fishes

Brook trout  
Blueback charr  
Yellow perch  
Minnnows  
Lake chub  
Golden shiner

Common shiner  
Redbelly dace  
Creek chub  
Pearl dace  
White sucker

## Physical Characteristics

Area - 262 acres  
Average depth - 44 feet  
Maximum depth - 92 feet

Temperatures:  
Surface - 66<sup>0</sup>F  
85 feet - 46<sup>0</sup>F

Principal fisheries: Brook trout, blueback charr

Deboullie Lake is a cold, deep lake especially suited for coldwater game species. Water below the 15-foot level is cold with abundant dissolved oxygen during the warm summer months.

Spawning areas for brook trout in Deboullie Lake are chiefly within the lake and in its single inlet tributary. The trout fishery is dependent on natural reproduction and migration from adjoining waters.

Deboullie Lake supports a population of the rare blueback charr. Spawning areas for the charr are on the bouldery shoreline within the lake.

Conservative fishing regulations have been implemented to maintain and enhance the sport fishery.

Deboullie Lake is one of many ponds situated in close proximity in T15 R9, a township owned by the State of Maine. Two-wheel drive access to the lake is via improved gravel road. A fording of the Red River is necessary to reach the unimproved boat launch.
